Andras Nemes

Senior Engineering Manager | Platform Engineering | Change Management | Distributed Teams

Greater Stockholm Metropolitan Area

Summary

Senior Engineering Manager in platform engineering with a quality-first mindset and a focus on predictable delivery. I care deeply about engineering excellence, especially automated testing, because it keeps systems stable and change safe. I lead two distributed teams across Sweden and India (CET/IST) and I enjoy building clear ownership, strong collaboration, and direct communication. I aim to lead with empathy while keeping expectations and delivery commitments crisp. My background is hands-on engineering across .NET, Java, and cloud-native platforms. I have worked extensively with microservices, messaging, APIs, and modern cloud environments (AWS and Azure). Technical blog: <https://dotnetcodr.com/>

Experience

Flexera

5 years 5 months

Senior Engineering Manager, Platform Engineering

April 2025 - Present (1 year 4 months)

Stockholm

Lead two software development teams (12 engineers across Sweden and India; CET/IST). Own talent development, recruitment, coaching, and performance management across engineers from junior to principal level. Partner with PMs/POs on prioritisation, capacity planning, and delivery commitments, ensuring clear trade-offs and predictable execution.

Key deliveries:

- * Zero Downtime Deployment: enabled self-service PowerBI report deployments by automating the deployment pipeline and removing manual intervention
- * Notification Service: launched a platform service to standardise customer notifications across products

* Cross-sell enablement: led initiatives aligning Snow Atlas and Flexera One capabilities post-acquisition, accelerating shared delivery

Engineering Manager (Formerly Snow Software)

September 2022 - April 2025 (2 years 8 months)

Stockholm

Engineering Manager for cloud platform teams, with scope varying from 2 to 14 engineers (primarily Sweden, plus one engineer in the UK). Started with one team and later took over an additional team as the organisation scaled.

I owned people leadership end-to-end: hiring, onboarding, coaching, performance management, and career development. In parallel, I partnered closely with PMs/POs on prioritisation, capacity planning, and delivery commitments, balancing trade-offs and managing dependencies to keep delivery predictable.

Key outcomes:

- * Launched the Snow Atlas data ingestion pipeline, modernising ingestion of inventory data from Snow agents on customers' devices into a microservices-based platform
- * Delivered the File Manager service as a standard platform capability for document and file storage, adopted by other teams and reducing duplicated implementation work
- * Led change management during the acquisition by Flexera, keeping teams focused and stable through uncertainty and preserving continuity

Tech context: cloud-native microservices on Kubernetes/Docker, Go and .NET, NATS messaging and JetStream streaming.

Senior Software Developer (Go/.NET) (Formerly Snow Software)

March 2021 - September 2022 (1 year 7 months)

Greater Stockholm Metropolitan Area

Senior Software Developer working on a high-traffic, cloud-native, microservice-based data warehousing platform. Focused on building reliable backend services, improving performance and operability, and keeping quality high through automated testing and clean design.

Tech stack: Go and .NET 6, Kubernetes/Docker, Azure, NATS, Redis

MalaveDo

Assistant Instructor (Karate) | MalaveDo | Stockholm | Part-time/
Volunteer

September 2017 - Present (8 years 11 months)

Greater Stockholm Metropolitan Area

- * Assist the principal instructor (Ramón Malavé, former world champion) in training beginner and intermediate karate groups, primarily children and teenagers
- * Lead warm-ups and structured drills, ensuring a safe and supportive training environment
- * Demonstrate techniques, explain fundamentals, and coach students individually to improve form and confidence
- * Occasionally step in as lead instructor when needed
- * Support grading and examination sessions, including preparation and assessment assistance

Apica Systems

10 years 5 months

Software Development Manager (Hands-on) | .NET / Java

January 2019 - February 2021 (2 years 2 months)

Greater Stockholm Metropolitan Area

Main responsibilities:

- * First people-management role: recruitment, onboarding, mentoring/coaching, and performance management
- * Led product line development and solution engineering from design to implementation
- * Owned architecture and design work; contributed to hands-on development in .NET and Java when needed
- * Explored new technologies and patterns to support long-term product architecture
- * Facilitated communication between the team and broader management to align priorities and delivery

Jr. Software Architect (.NET)

June 2012 - January 2019 (6 years 8 months)

Greater Stockholm Metropolitan Area

- * Designed and evolved .NET architecture, domain models, and solution proposals
- * Worked closely with stakeholders on requirements analysis and technical trade-offs
- * Implemented key components in .NET/Java, applying solid design patterns and best practices

- * Mentored and coached engineers, supporting onboarding and technical growth

Senior Software Developer (.NET)

April 2011 - May 2012 (1 year 2 months)

Stockholm

- * Developed and maintained product features, improving reliability and maintainability
- * Introduced and reinforced engineering practices such as continuous integration and agile ways of working (Scrum/Kanban)
- * Coached and onboarded new team members
- * Coordinated selected outsourced development activities and ensured alignment with team standards

Software Developer (Microsoft .NET)

October 2010 - March 2011 (6 months)

Stockholm

- * Built web features with ASP.NET (C# 4.0)
- * Developed database functionality with Microsoft SQL Server
- * Implemented data access using LINQ
- * Contributed to front-end work with XHTML, CSS, and JavaScript

STMicroelectronics

6 years 2 months

Supply Line Manager (50%) / Programmer (50%)

July 2008 - September 2010 (2 years 3 months)

Stockholm

Supply chain (50%):

- * Forecasting and demand planning (short/medium/long term), inventory control, and ramp-up/down planning
- * Version change management and on-time delivery coordination across stakeholders
- * Billing and volume planning: monthly plan creation, tracking, and reporting
- * Contributed to process improvement initiatives, including implementation of a new forecasting tool (i2DM)

Software development (50%)

- * Delivered programming tasks ranging from small automations to larger internal tools
- * Automated reporting and operational workflows (Excel/Access)
- * Tech: Java, VBA (Microsoft Excel and Access)

Supply Line Manager

January 2007 - June 2008 (1 year 6 months)

- * Owned short-, medium-, and long-term forecasting and supply planning, including inventory control and ramp-up/down management
- * Managed version change planning and ensured on-time delivery of critical components
- * Supported order fulfilment process improvements and acted as a key communication interface across functions
- * Created monthly volume and billing plans; tracked and reported billing performance
- * Participated in key projects, including implementation of a new forecasting tool (i2DM)

Business Planner

August 2004 - December 2006 (2 years 5 months)

- * Managed planning and customer coordination for Siemens Mobile, working with factories and stakeholders globally
- * Represented the company towards the customer and ensured clear communication across sites
- * Created monthly billing plans; tracked and reported billing performance
- * Coordinated supply and fulfilment to ensure on-time delivery
- * Spent 2006 based at the Munich office in Germany

Nokia Mobile Phones

Supply Planner

October 2003 - August 2004 (11 months)

Komárom

- * Coordinated with sales units across Europe to manage short- to medium-term supply planning
- * Tracked planning inputs, analysed sales data, and identified demand/supply risks
- * Supported on-time delivery through close follow-up and cross-functional communication
- * Created and maintained SAP product master data (opening codes for new products)

Education

University of Birmingham

MSc, Economics · (2002 - 2003)

Distance courses within IT and programming at different Swedish universities

Programming, databases, web technology · (2009 - 2011)

University of Birmingham

BSc, Economics with German · (1998 - 2002)

Leysin American School

International Baccalaureate · (1996 - 1998)
